More Information

Each of our log homes is constructed with a fully insulated roof and a suspended insulated timber floor, complemented by high-quality double-glazed timber joinery. We offer two wall specification options: the classic **75mm solid log** and the **75mm BS3632 insulated log**, which includes an internal insulated cavity for enhanced thermal performance.

The standard **Internal Fit-Out Package** boasts a bespoke Kitchen & Utility design, high-end Bosch appliances, luxury Bathrooms, premium Flooring, and complete electrical, heating & plumbing systems, including mains pressure hot water. Remember, every option is bespoke and can be adapted to meet your individual requirements.

The prices provided are intended as a guide and are calculated based on a 50-mile or 1-hour driving radius from Reading. Please be aware that these prices do not include site delivery, which starts at £1,600.00. The final price will be determined by factors such as your site's postcode, accessibility, ground conditions, and any necessary site preliminary arrangements (like scaffolding, storage, welfare facilities, refuse disposal, and the provision of a suitable pitch according to our guidelines). A detailed specification will be provided within your comprehensive quotation. For extended peace of mind, the warranty is extendable through a paid **After Care Service Plan** agreement, and we can provide further details upon request.

All listed prices are inclusive of VAT where applicable. Notably, mobile homes that adhere to the BS3632-2023 standard or higher are zero-rated for VAT. Non-compliant structures will incur a 5% VAT charge, which is incorporated into the price where relevant. Please understand that all prices are contingent upon a thorough site survey and a formal written quotation, in line with our **Standard Terms and Conditions of Contract**.
